shore collecting included Geoff Grognet, Myriam Preker, Mary Lou Malott, Mike LeBlanc, Gary Silver, Doug Swanston and Chad Thorpe. We thank Janna Nichols and Greg Jensen for searching out a cryptic *Polymastia* in Hood Canal, WA. Jim Watanabe, Siobhan Gray and Jeff Goddard obtained key specimens of *Tethya*. Sub-scuba zone material was collected from the submersibles *PISCES IV*, *DELTA* and the ROV *ROPOS*. We thank their respective crews for their expert support in collecting material. Many of the earlier dives were made jointly with Verena Tunnicliffe. George Schmahl kindly provided access to the specimen of *Sphaerotylus raphidophora*. Partial funding was provided by a Discovery Grant from the Natural Sciences and Engineering Research Council of Canada to HMR. Neil McDaniel, McDaniel Photography, took most of the *in situ* underwater photographs and gave his permission to use them.
